

Luciano Inzunza.

Age 49.

Im from Chile, living in Sweden.

I've been doing full-time network in 15 years,
and working with crypto/
digital for the last 6 years.

When I started with crypto, I put in my last 125€

That was 6 years ago, and that's what brought me where I'm today!

Why I joined MTI?

First it was for duplicating my BTC. But looking closer, I decided to do this with my team.
I can tell you, I have never been in a company that is transparent and easy to work with.

Its actually the first time that Im working in Sweden, and thats because

I never came across such a trustworthy company, and being so secure in company until now.
So now we are growing a huge team in Sweden, and I'm so proud of our leaders!

What makes us successful?

Is all thanks to our dedicated leaders, giving our new members the education about what we do,
and being there to support them.

Not just the networking. It's all about getting ready to do network.

How cryptocurrency works, how to open a wallet, and how to approach people the right way.

When you have done all this, it will be easier for them to go to next step and grow.

My vision and future with MTI is to help others to join and see what a great opportunity this is.

And I believe that this company will be here for my kids when they grow up and can take over
where I'm today .

"Be the leader that you want your own leader to be.

Support is the key to grow your business the right way."
